what I do

- Sound Designer MusicalFieldsForever.com, in group for interactive art installations since 2000
- Teacher and Associate Professor at NTNU Norwegian University of Science and Technology
- Dr. in [Musicology](#) from University of Gothenburg, Sweden
- Working on [Universal Design](#) and [Design For All](#) projects for persons with disabilities since 2005
- In the [RHYME](#) project (2011-2016) together with [Jo Herstad](#), Harald Holone ([ifi/UoI](#)), Birgitta Cappelen, Fredrik Olofsson at Interaction Design/The Oslo School of Architecture and Design (AHO), Even Ruud, Karette Stensæth at Sentre for Music and Health/Norwegian Academy of Music (NMH)

Multi-Sensorial Interaction Design for Health

Anders-Petter Andersson: Assoc. Prof. NTNU in Interaction Design, Internet of Things, Sound Design

Persons with dementia, multi-sensorial interactive arenas

Children with severe disabilities, RHYME.no

Multi-Sensorial Interaction Design for Health

Anders-Petter Andersson: Assoc. Prof. NTNU in Interaction Design, Internet of Things, Sound Design

Design of:

- Health and welfare technology increasing activity, social relations, creativity and mastery

With:

- Elderly persons with dementia, HELSEVEL NFR/NTNU, Diakonhjemmet Univ. College/VID, Postdoc/Kristianstad Univ.
- Children with severe disabilities and families, RHYME.no NFR/AHO/Uo/ NMH/Arts Council Norway, iFields Lund University/Arvsfonden

Through:

- “Musicking” that motivates communication, mastery, co-creation with physically, rhythmically, musically and visually mediated interaction

And:

- User-Oriented Action Research, Participatory Design, Research-by-Design, Universal Design

overview

- What do we **listen** to in music?
- What is the **materials** of music? What is it made of?
- What are the **structures** of music?
- How can we **use music** when designing **interactivity**?
- Case: RHYME project and the Polly Ocean interactive mobile musical and multi-sensorial environment (RHYME.no)
- Discussions

what do we listen to in music?

- Do I **know** the song?
- Do I **like** it?
- Why?
- Why not?
- What do I **do** when listening to the song?

what do we listen to in music?

what do we listen to in music?

- What are the **instruments** playing?
- Has the song a rhythmic **beat** or not?
- Who is **singing**? What do they sing about?

what do we listen to in music?

- Can you **expect** what will happen **next** in the music?
- How is that possible?

what do we listen to in music?

- How is the song structured **over time**?

what do we listen to in music?

- What is a **genre**?
- Socially and culturally **negotiated**

instrument

- How is the sound produced?
- What instruments are playing?

instrument

- Idiophones

- Xylophone, Mbira, produce sound by vibrating themselves
- Sachs-Hornbostel musical instrument classification system, 1914

instrument

- Membranophones
 - Drums or kazoos, produce sound by a vibrating membrane

instrument

- Chordophones
 - Piano, hurdy gurdy, guitar, which produce sound by vibrating strings. Pluck, bow, struck, blow (Aeolian harp)

instrument

- Aerophones

- Pipe organ or oboe, produce sound by vibrating columns of air. Wind, Brass, Free (bull roar).

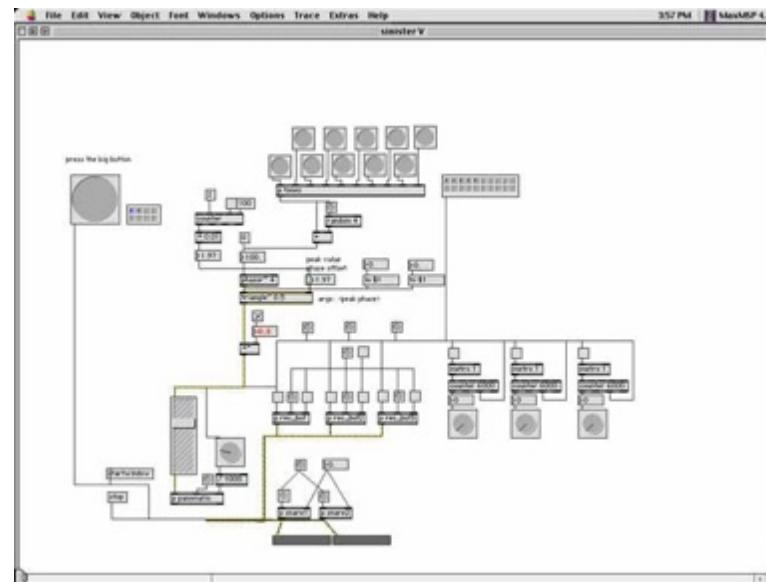

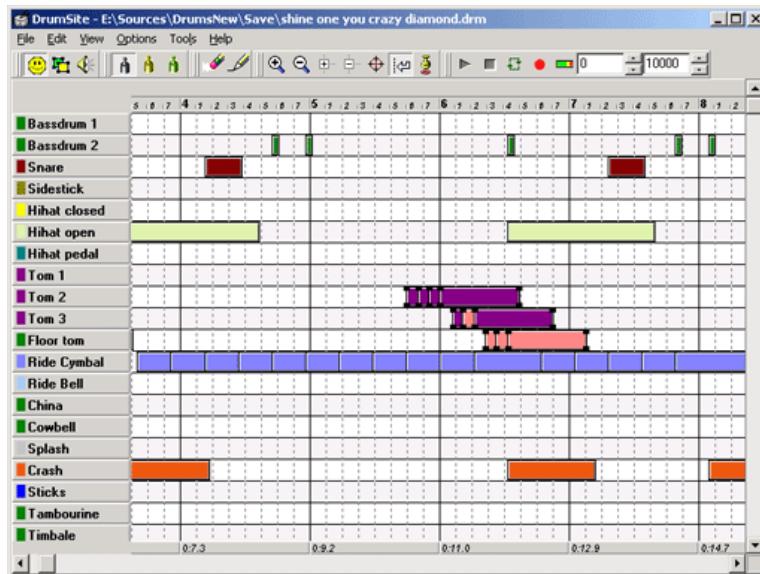

instrument

- Electrophones
 - Electric actions, Electric amplification, Radio electric oscillation in synthesisers, Theremines, Computer programme circuits

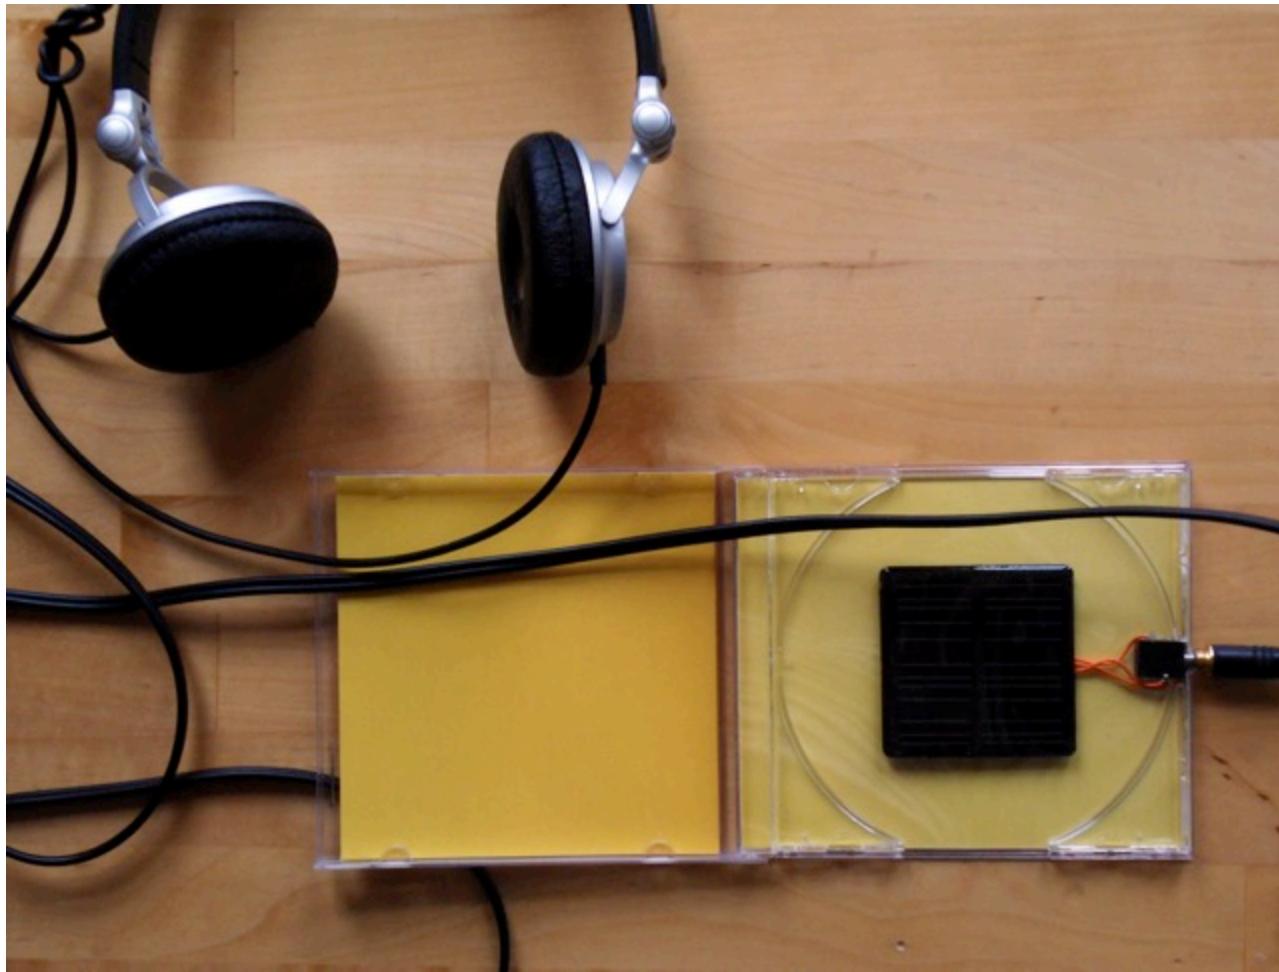

instrument

- Electrophones
 - Sequencer, drum machines, step sequencers, interactive environments
Max/msp

instrument

- Electrophones
 - Sound of the sun, Mats Björk, 2009

instrument

- Musical gestures

iterative

sustained

impulsive

complex

instrument

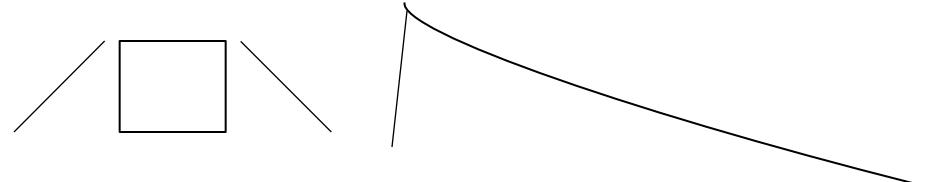

- Ensemble
 - Rhythm section, Accompaniment, drums, base
 - Soloist
 - Chord instrument (piano, guitar, horns, choir)
- Register
 - Soprano, alto, tenor, base

structures of music

- Fundamentals

- Attack**, sounding body, ending

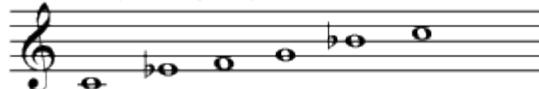

- Melody, melodic theme, figure, riff, beat

- Scale**, Mode/Modality

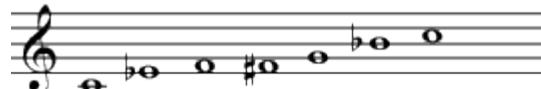

Transposed "Black Key" Pentatonic Scale

Same Scale (not transposed) from C to C instead of E-flat to E-flat

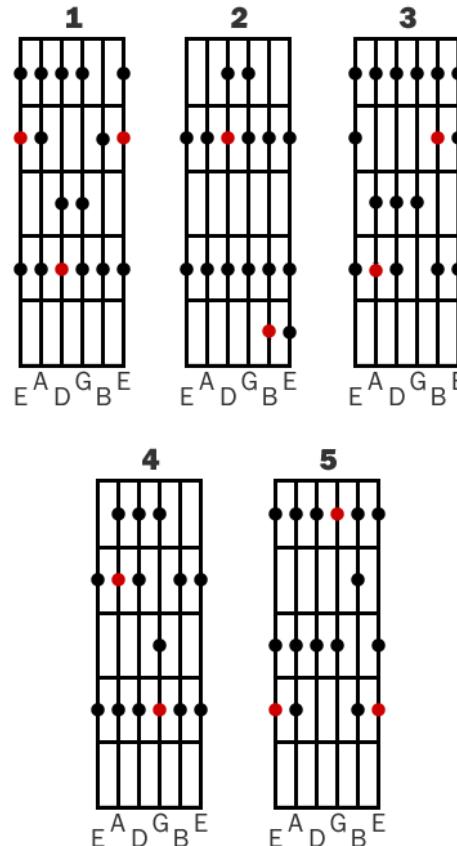

Add an F-sharp : A commonly used Blues Scale

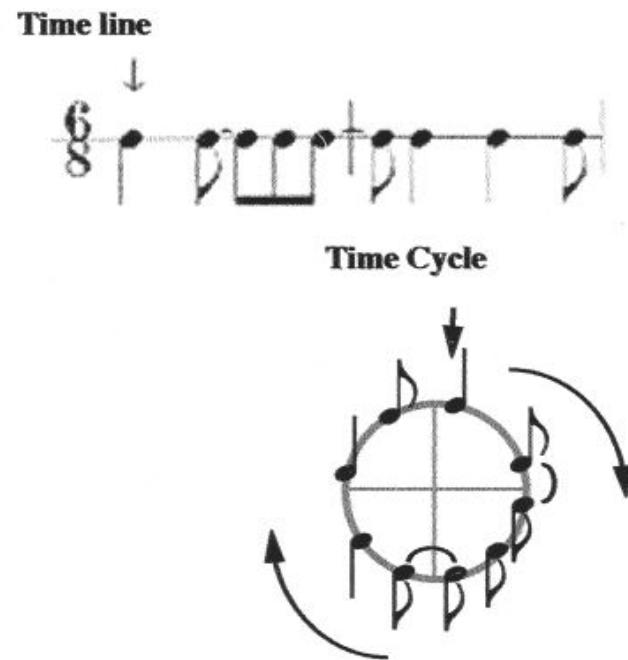

structures of music

- Fundamentals
 - Harmony, Chords, Modality

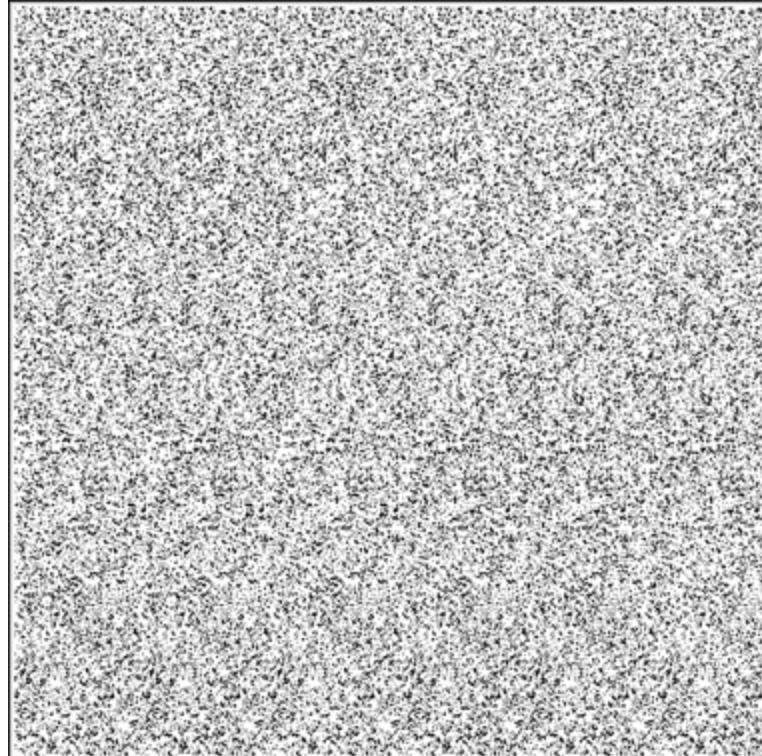

structures of music

- Fundamentals
 - Rhythm patterns, repeated beats and metrics/time Matrix

structures of music

- Fundamentals
 - Sound, tone color, timbre
 - Effects, reverb, echo, distortion, synthesis, resynthesis, cycle~, noise~

structures of music

- Fundamentals
 - Genre, Socially constructed, cultural
 - Style in music
 - pop, folkmusik, techno, jazz, Bach, Mozart +++

structures of music

- **Songlines** - singing the land
 - Dreamtime
 - Language = singing
 - singing = walking

structures of music

- Nomad foot bells, Namibia
 - Music **instrument**, dance, status/**identity**, mobile **money**
 - Music = Social everyday life = Culture

the

RHYME

project
(2011-2016)

Arkitektur- og designhøgskolen i Oslo

The Oslo School of Architecture and Design

NORGESMUSIKKHØGSKOLE
Norwegian Academy of Music

Method and approaches

Ecological and Humanistic Health approach (Blaxter, 2010)

Everyday use of music (DeNora 2000, Ruud 2006)

Research by design (Schön, 1983) and **User-centred design**

Art and design perspectives on technology

Multidisciplinary

(Industrial Design, Interaction Design, Universal Design, HCI, Music Therapy, Music&Health, , Musicology, Art,)

Action research, 4 generations of prototypes

4 actions of every generation, 6 families

Video observations, multidisciplinary discussions ,

Interviews, Focus group

Goal

co-creation with tangible,
spatial, **cross-media**

by communicative, **musical** and **narrative**
principles (aesthetical)

to **improve health** and well-being
for people with severe **disabilities**

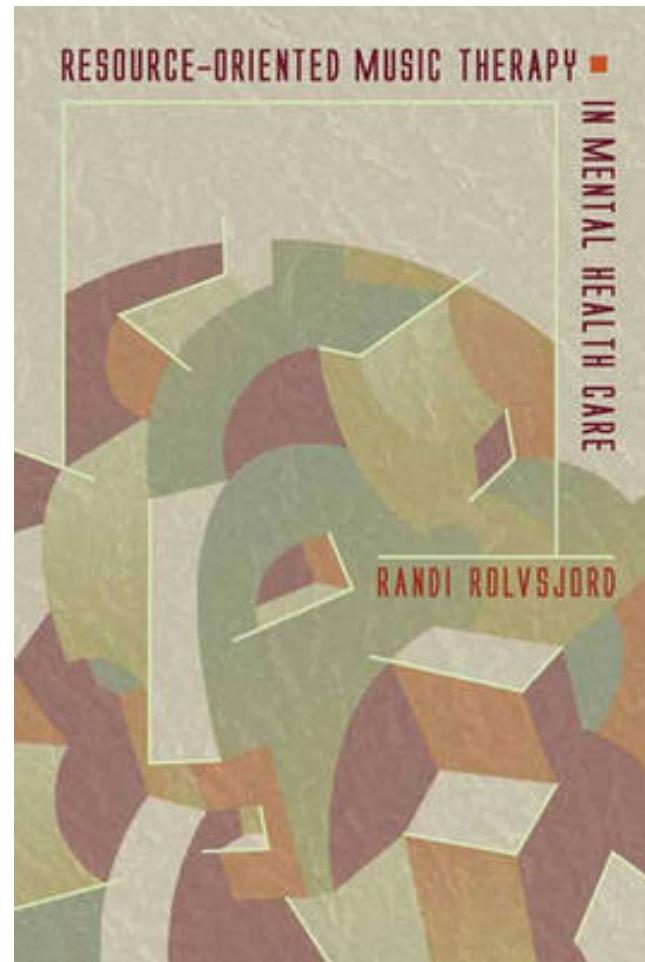

**Health categories
reduce passivity and isolation**

vitality and self expression,
action
community, relation and participation,
meaning and mastery

**from Music Therapy
and Music and Health**

Resource-orientation Therapy as Empowerment

Music and Health

Even Ruud

Antonovsky (salutogenese)

Bandura (self-efficacy)

Seligmann

Daniel Stern

Design Challenge

Resource and Empowerment orientation

Focus on the **persons strengths** and abilities, **not** their special needs, **weaknesses** and diagnosis

offer:

- positive** experiences, **no wrongs** or failing
- many ways to vitality and **self-expression**
- many ways **to act** and build competence (mastering)
- many ways to strengthen **mutual social relations**
- many ways to **share** and **participate**

A blurry, colorful background showing a person playing a guitar and another person clapping, suggesting a musical performance.

they play, evoke emotions, communicate and experience music together

our Musicking Tangibles

Motivate musicking,

Reduce isolation and passivity (our health goal)

Open to **many ways**

Interpretations (instrument, co-musicians, ambient landscape)

interaction forms

activity levels

Relations

Musicking

Simultaneously

Develops over **time**

4 Generations of tangibles and finings

1th Generation ORFI

ORFI

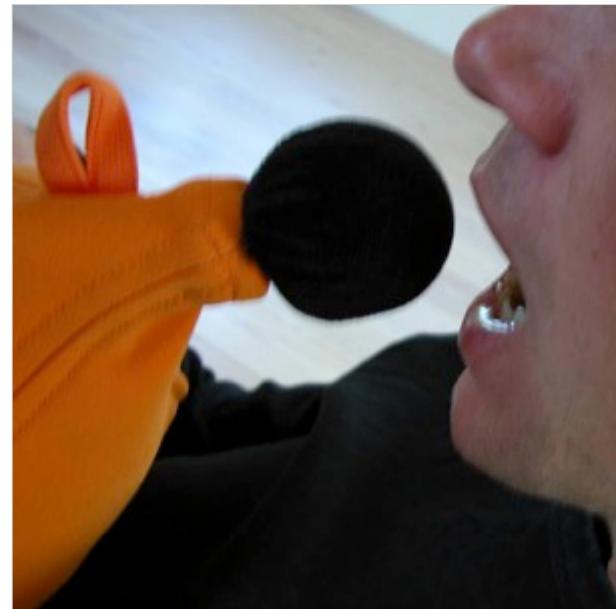

8 musical genres

A photograph of a woman and a young boy sitting together, smiling and interacting with a large orange and yellow fabric object. The woman is wearing a red long-sleeved shirt with "SPORTSLIFE SINCE 1982" printed on it. The boy is wearing a blue and white striped shirt. They appear to be engaged in a sensory activity involving the fabric.

creating music and sensorial experiences together

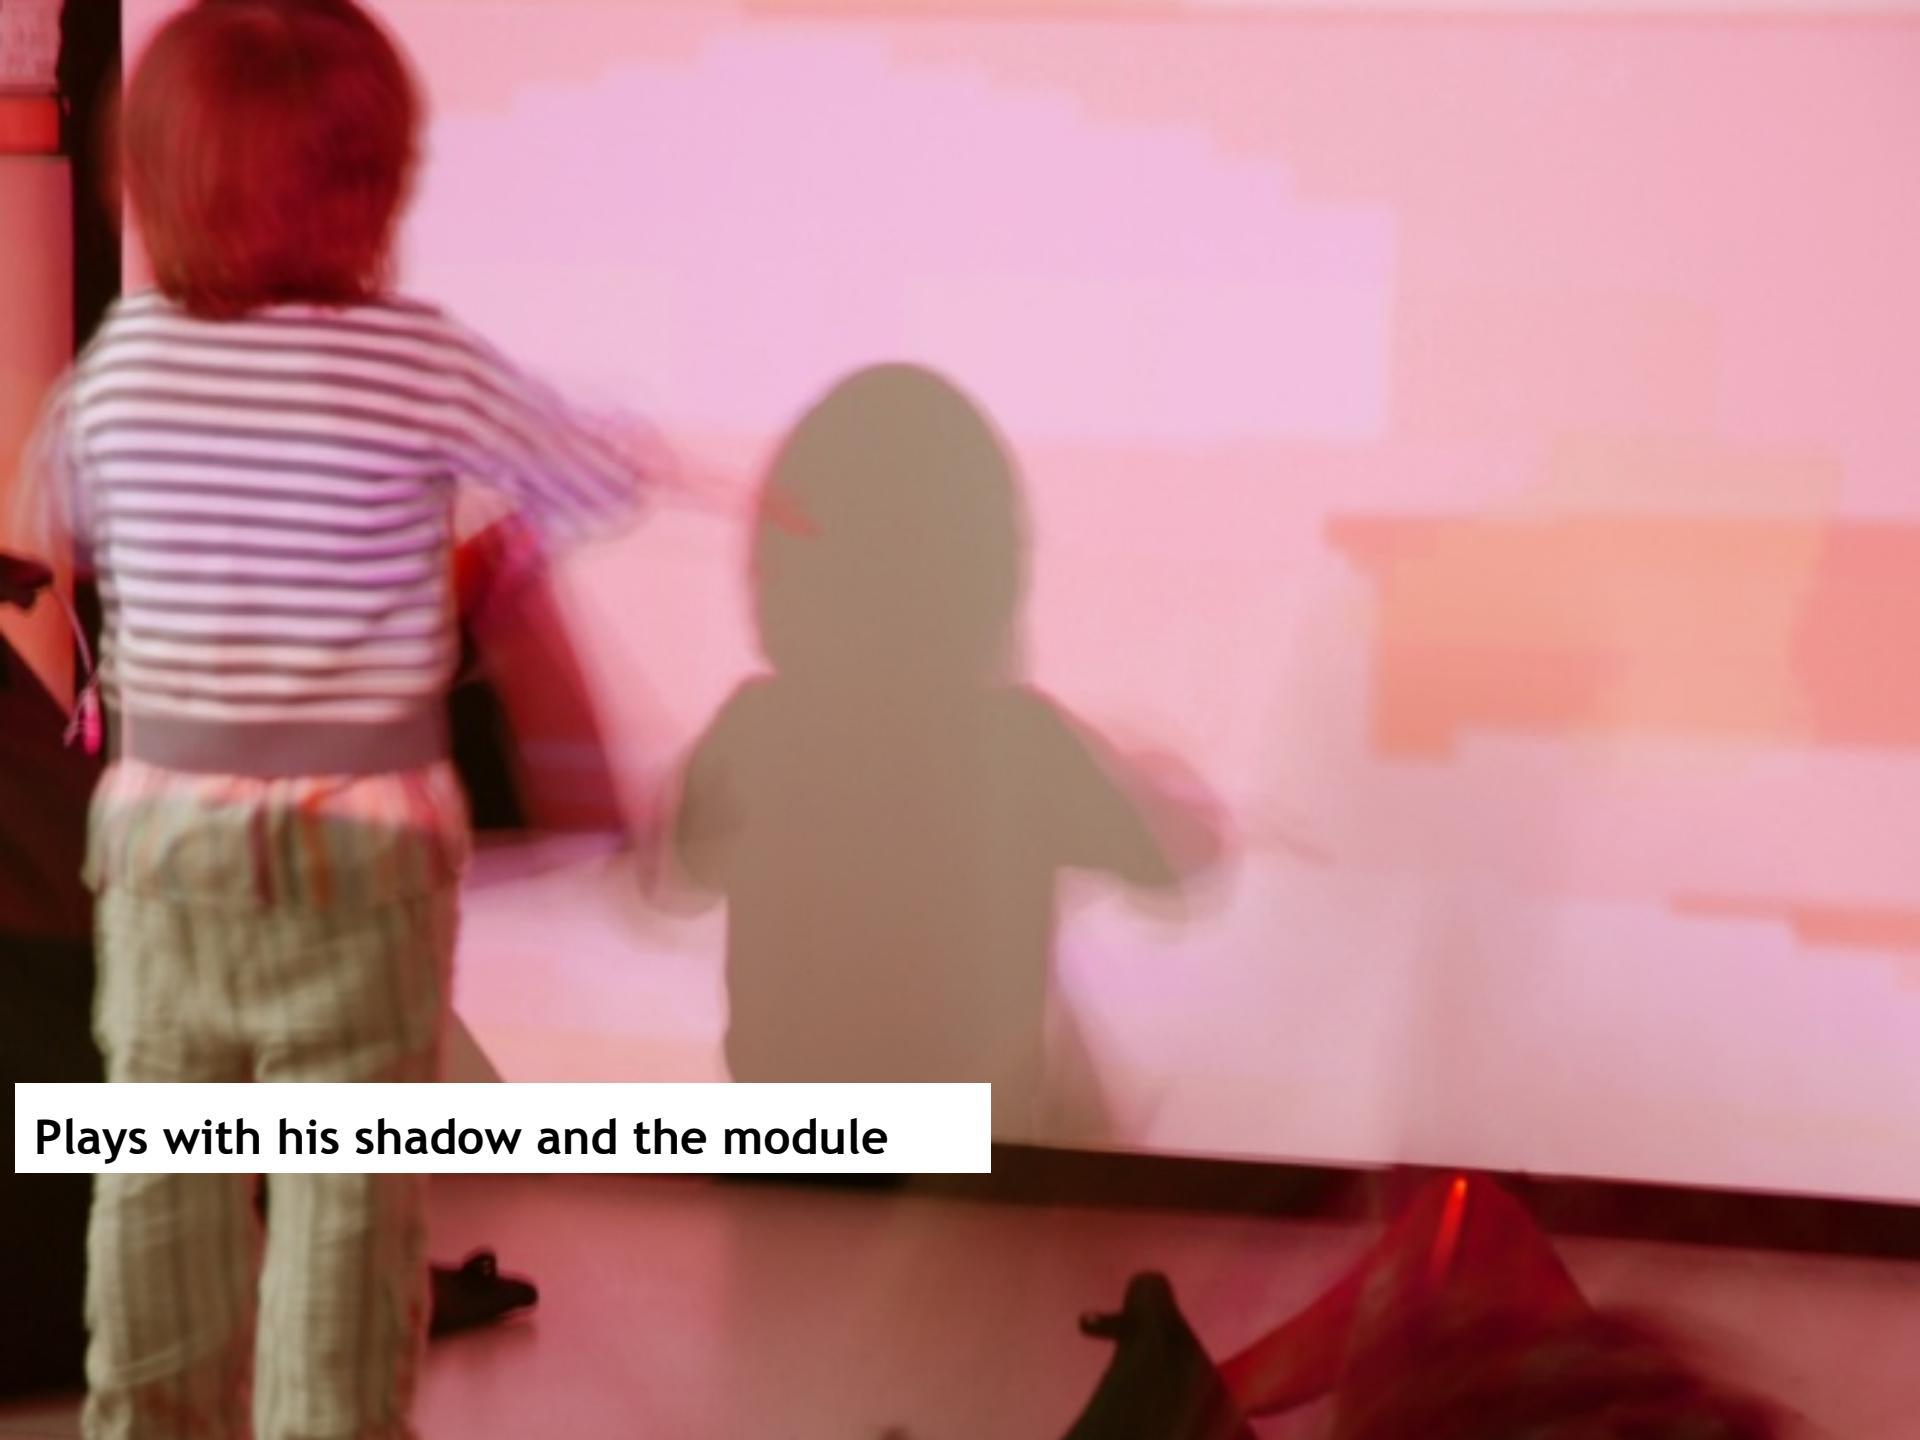

open to many forms of interaction and activity levels

personificate by physical and auditive inscription (tag)

motivating to change, distribute and restructure over time

Plays with his shadow and the module

they roll and throw

A close-up photograph of a young boy with short, light blonde hair. He is looking down and slightly to his left with a neutral or slightly weary expression. He is wearing a long-sleeved red shirt with white five-pointed stars on it, over a white collared shirt. He appears to be climbing a dark-colored staircase, with his right hand gripping a dark railing. The background shows the steps of the staircase.

he climbs

A close-up photograph of a young boy with blonde hair, smiling broadly with his mouth open. He is wearing a blue and yellow jacket over a yellow shirt. He is holding a black, textured object, possibly a book or a tablet, against a dark background.

he hits !

ORFI - observations and findings

new ways of musicking compared to traditional instruments.

The users:

played and treated them as **characters** and actors

said “goodbye” when they left

relaxed on them as in a **furniture**

threw and built with them as **toys** like soft Lego bricks

played on them as on **instruments**, or **synthesisers**

used them as a **stereo** to put on **ambience in music and visuals**

waited with excitement on their answer as **communication partners**

played with them as improvising co-musicians

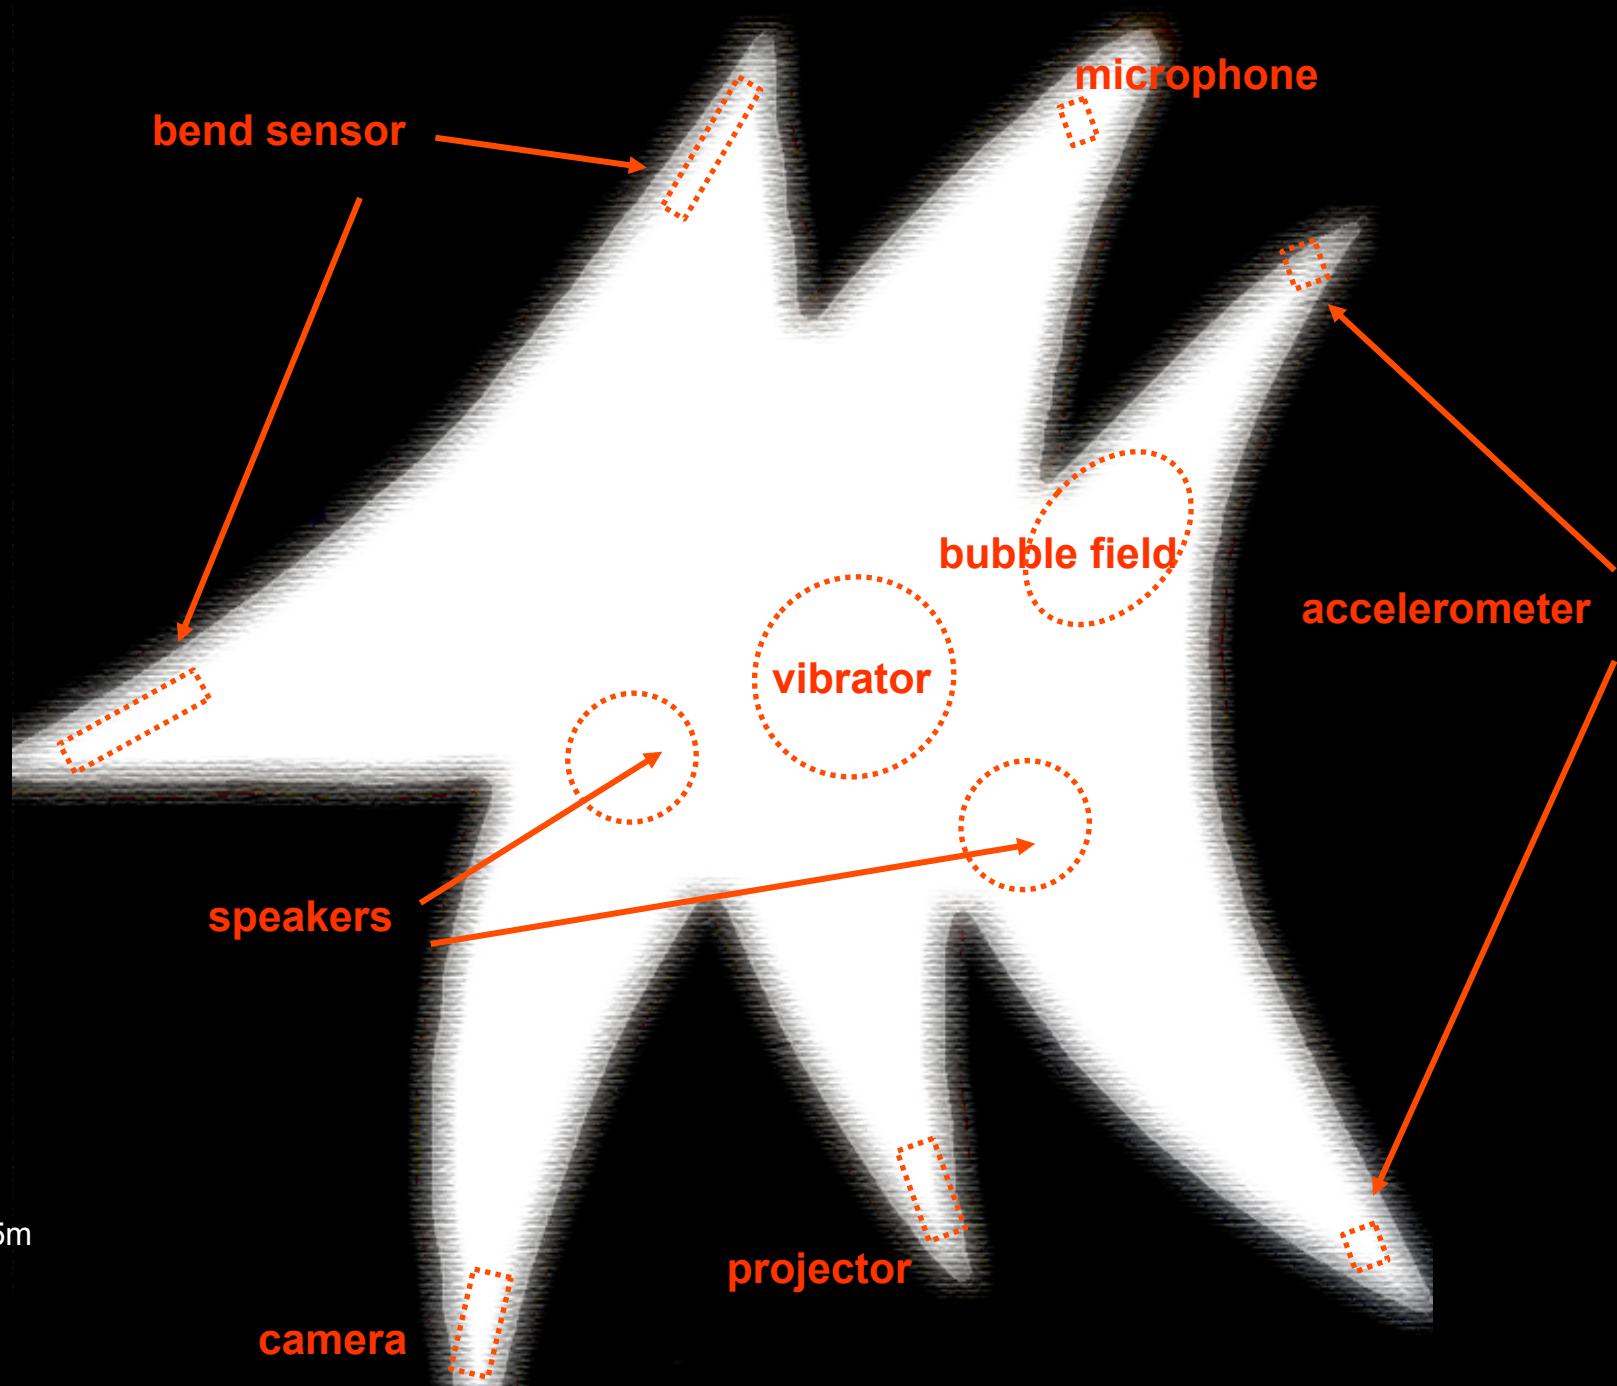

Problems

sensors too hard for some, wants more sensors

closeness between light and interaction place

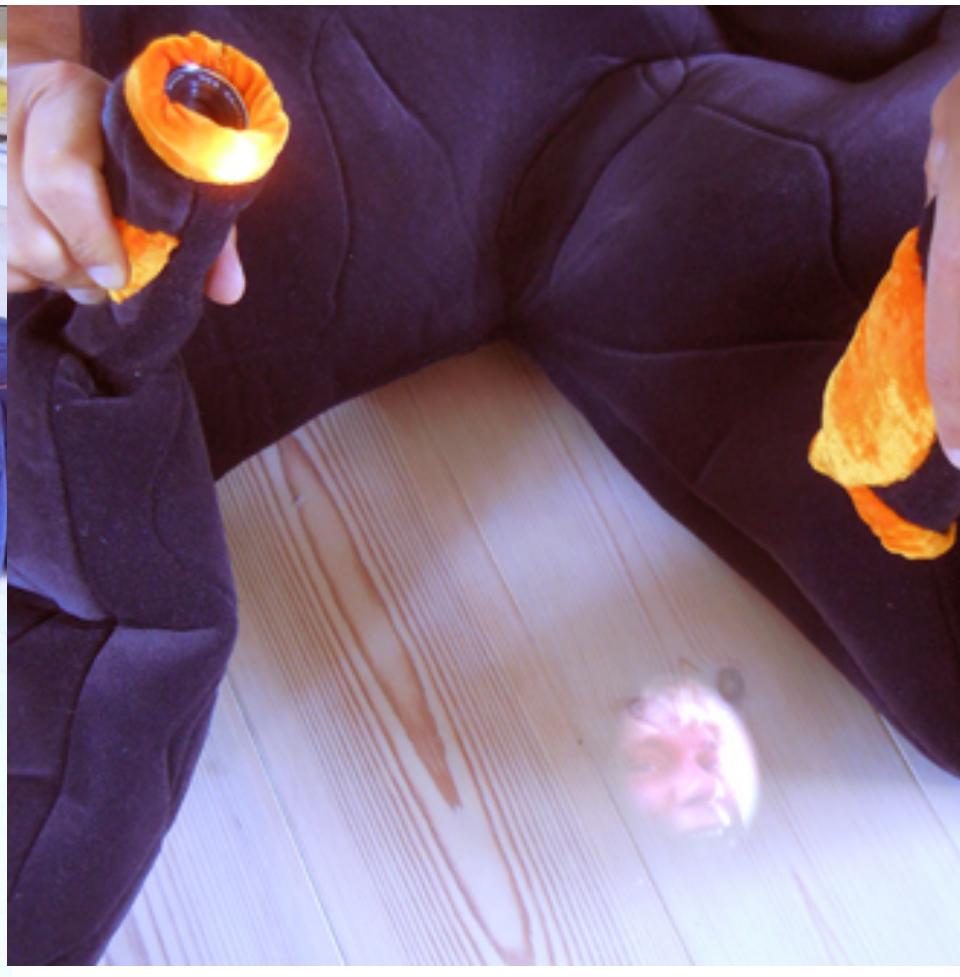

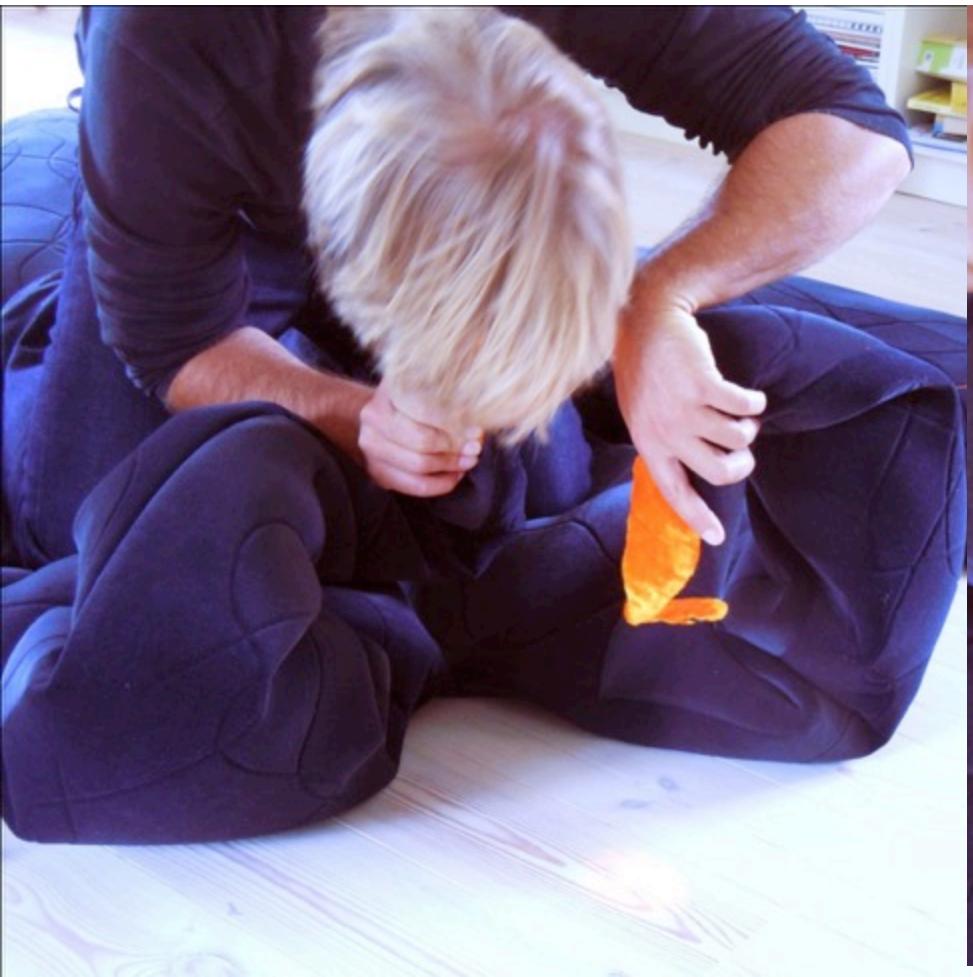

2th Generation Wave

glowing microphone and sensors when interacting

cross-media interaction

offer many ways of self-expression and cross-media interaction

offer many ways of self-expression

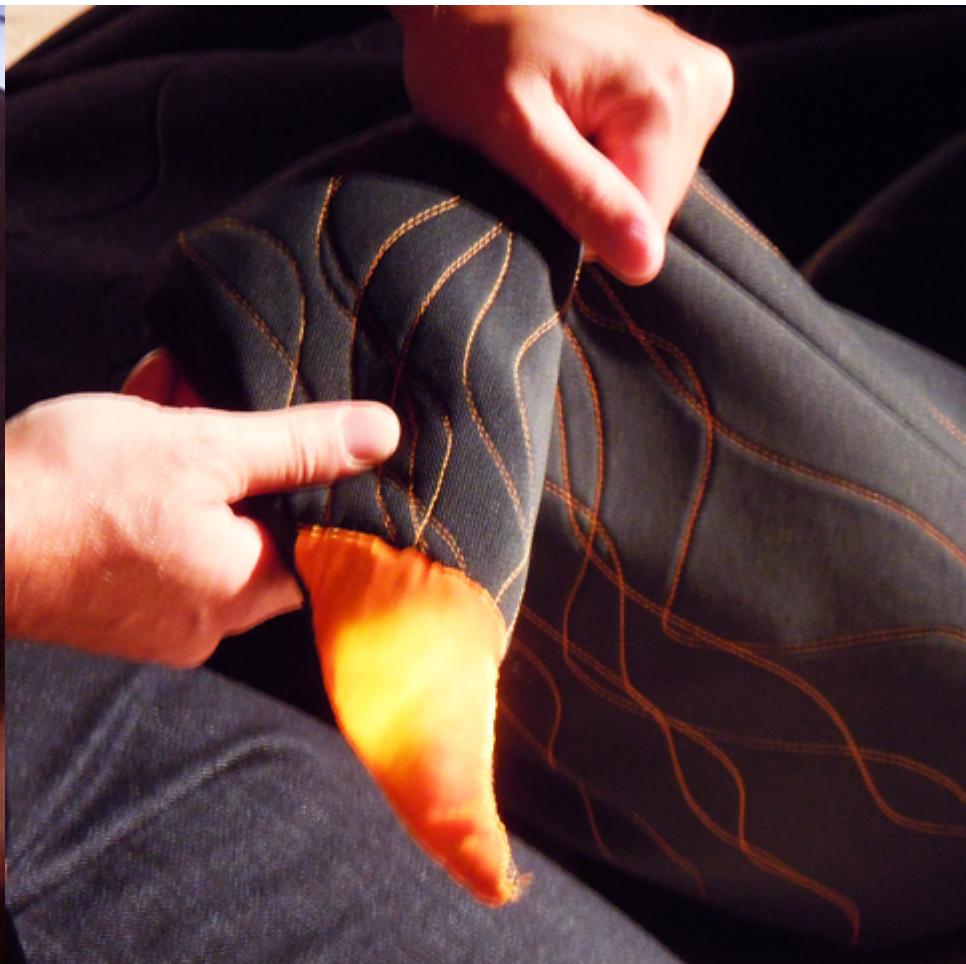

offer many roles to take, many musicking actions to make

Wave

Many ways to express one-self, act, master over time, build social relations, share and participate in the musicking experience

- Soft and **accessible** on the floor,
 - Invites to **different actions**,
 - **social relations (gameplay, bodily closeness)**
 - bigger and smaller **differently manageable** parts, multitudes of interaction possibilities,
 - **feasible** and sensitive sensor interaction invites to different activity levels,
 - challenging on different ability levels
-
- But too heavy and big, hard to hold for some

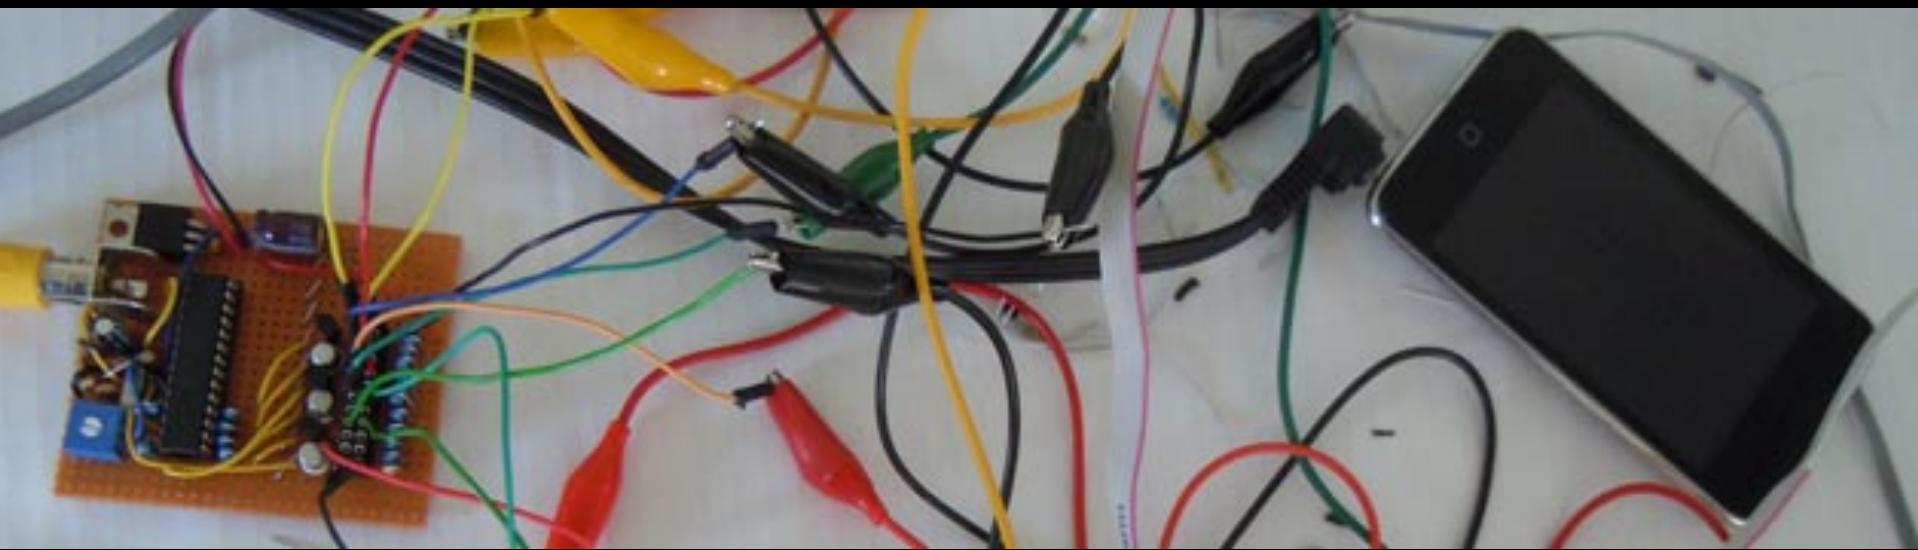

aesthetically consistent and challenging musical response

Girl interacting with Wave Carpets bubble field

3th Generation Mobile

3th Generation Orange

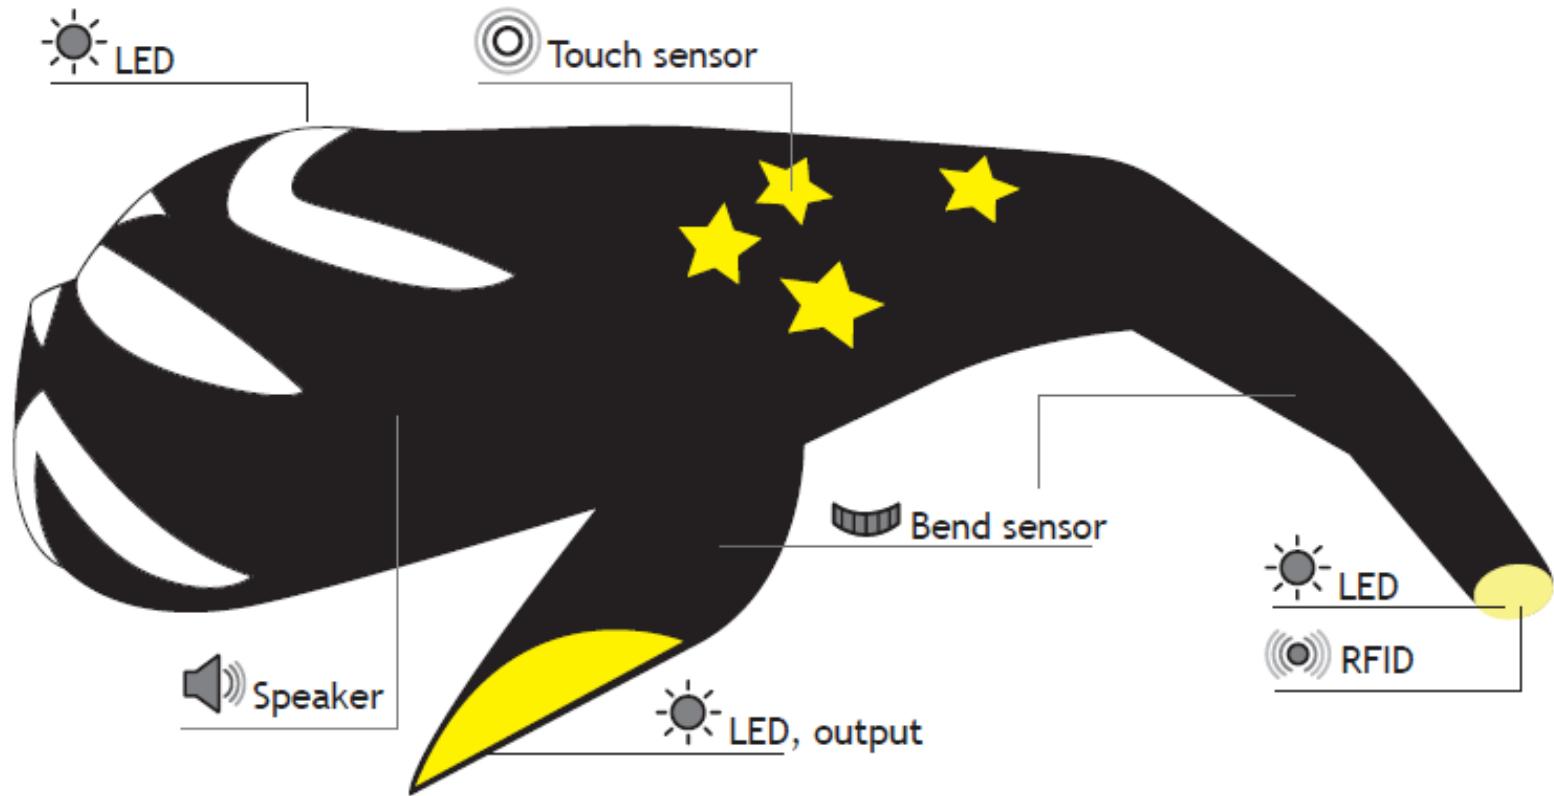

3th Generation Reflect

choose music and sound with the glowing trunch (rfid)

a soft lighting, sounding «head» to hold and lean into

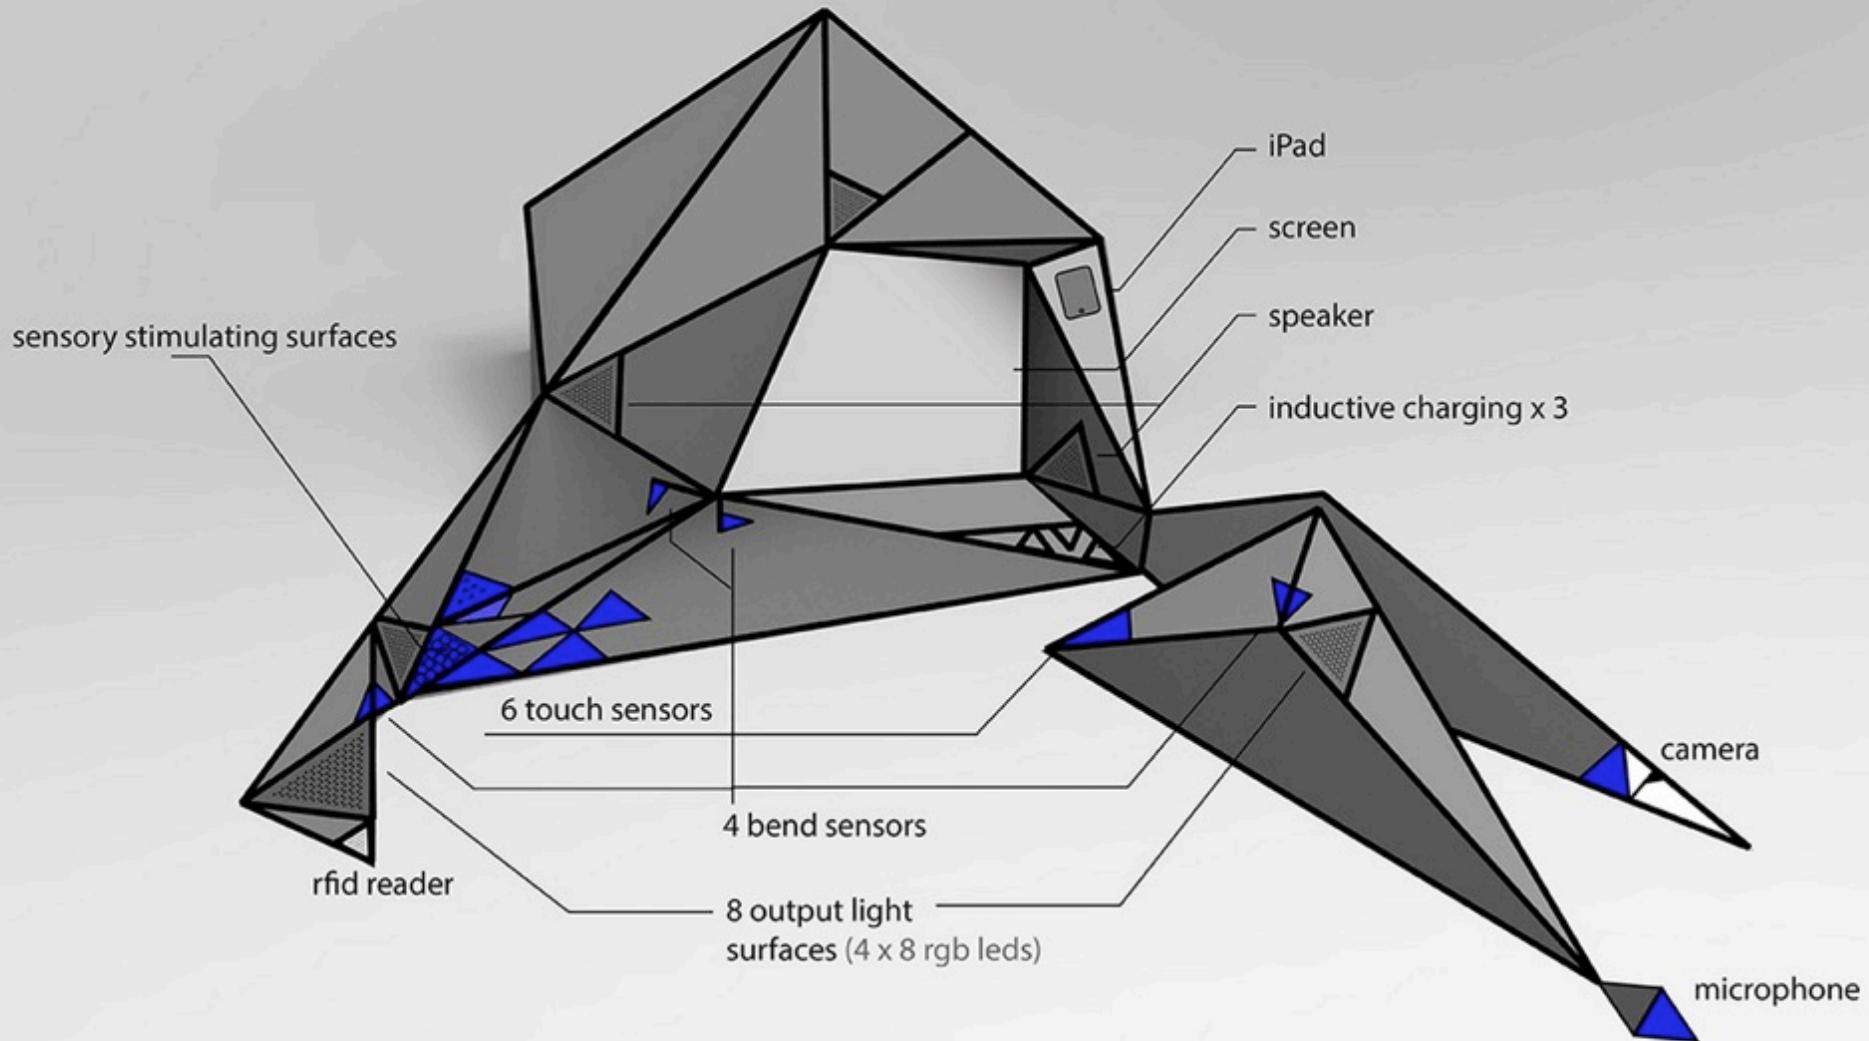

play with RFID tagged things

play more with star shaped glowing velvet touch sensors

4th Generation Polly

Choose your music with Scene Card (RFIID)

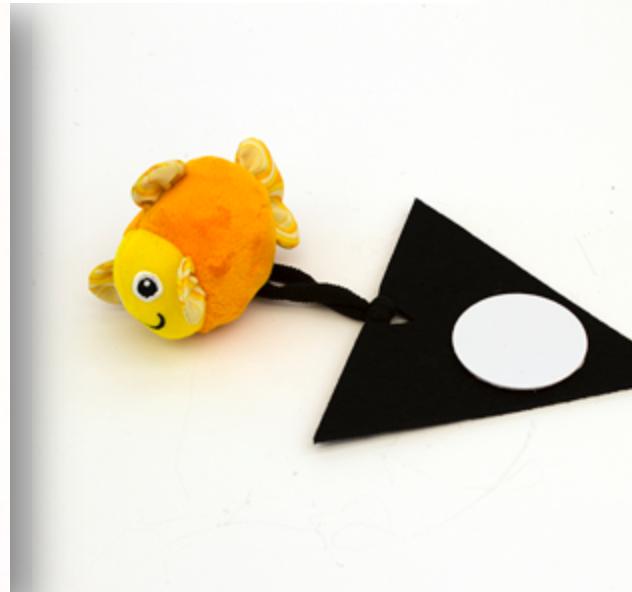

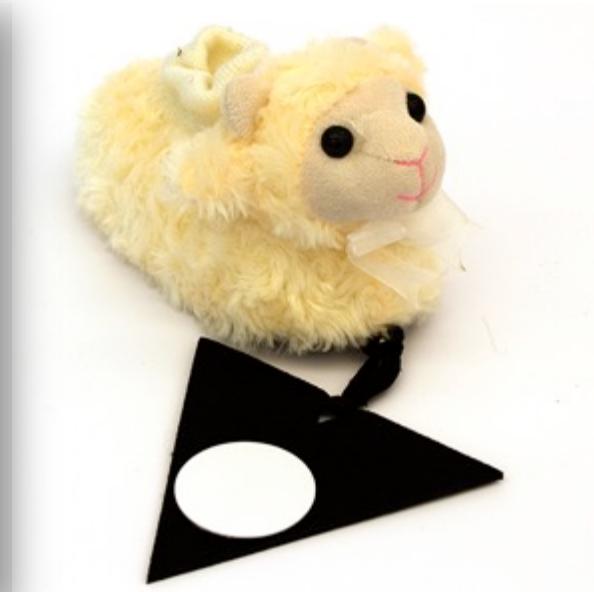

Scenes

(tagged - to choose music and visual expression)

Include their things

(to create and conduct a choir)

microphone shaping

1 Generation Microphone

2 Generation Microphone

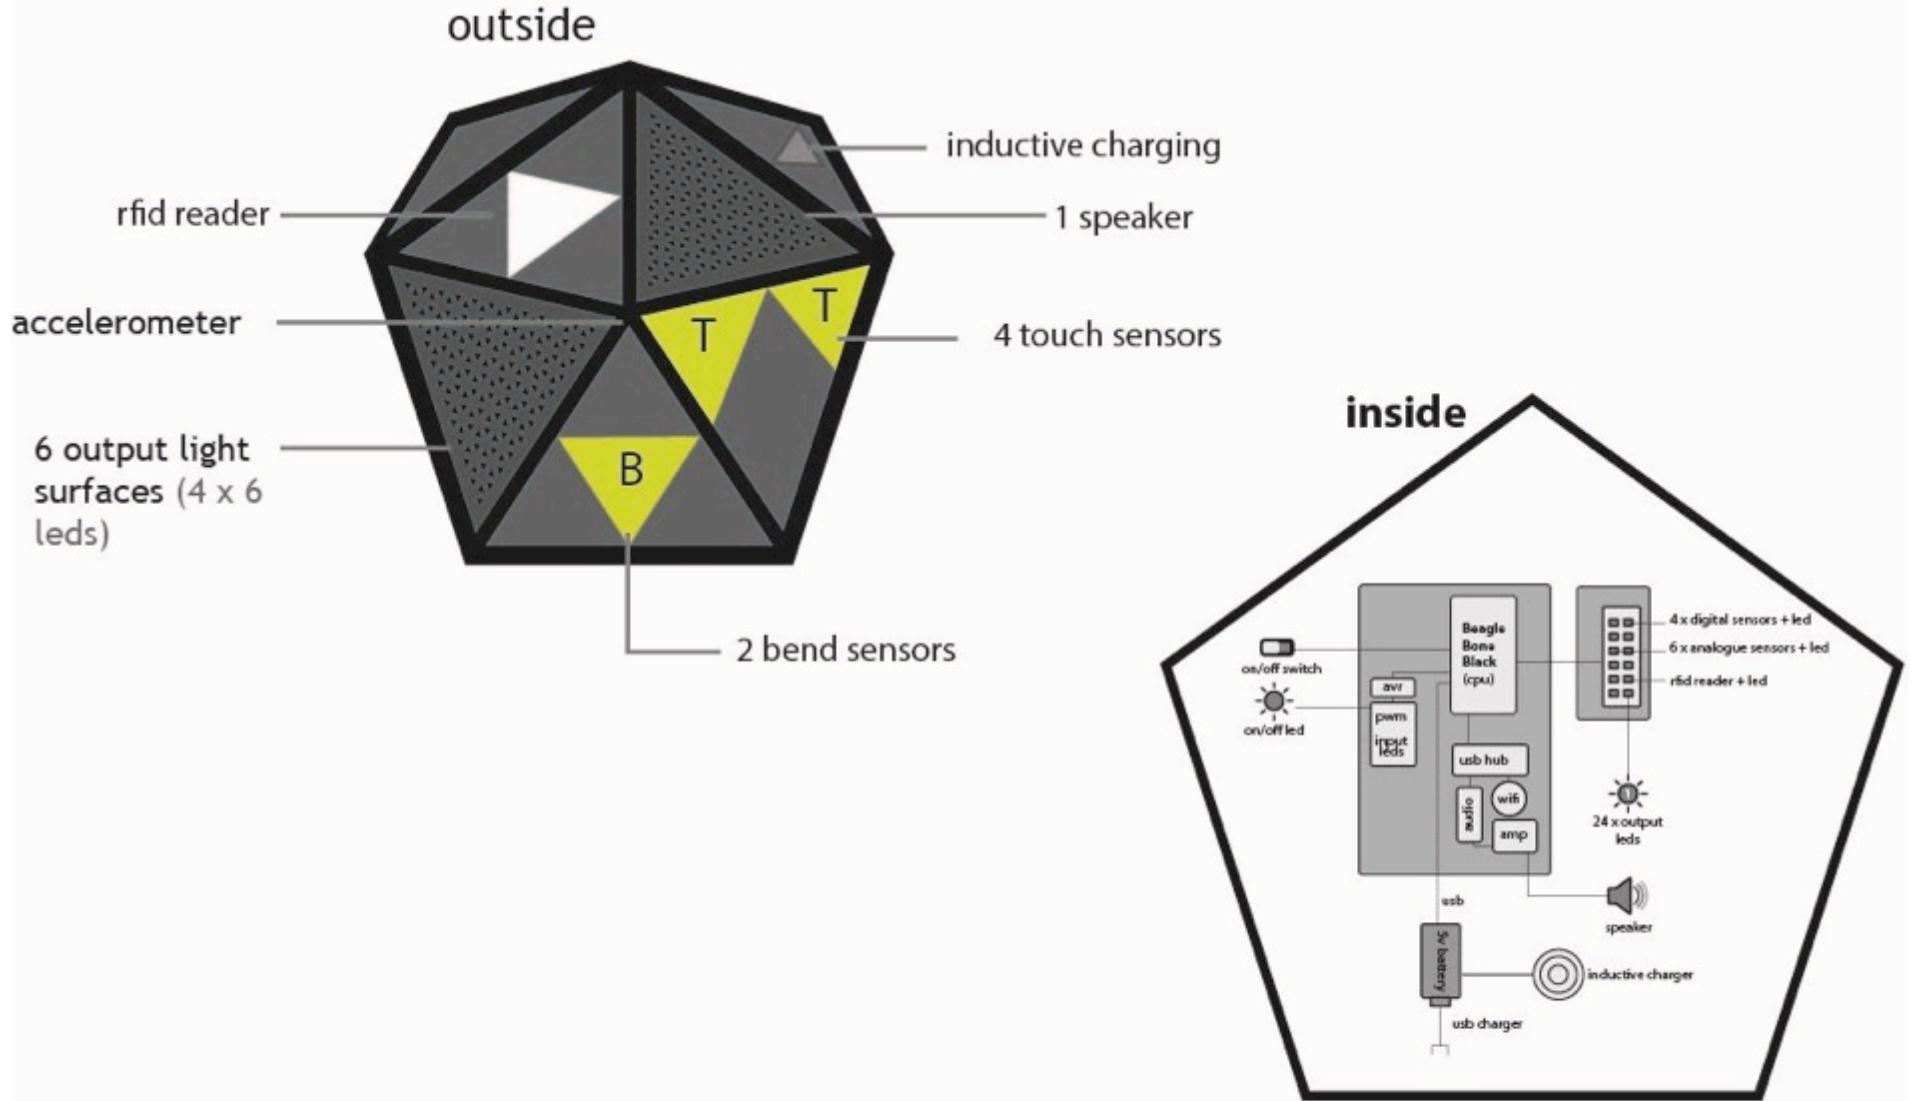

3 Generation Microphone

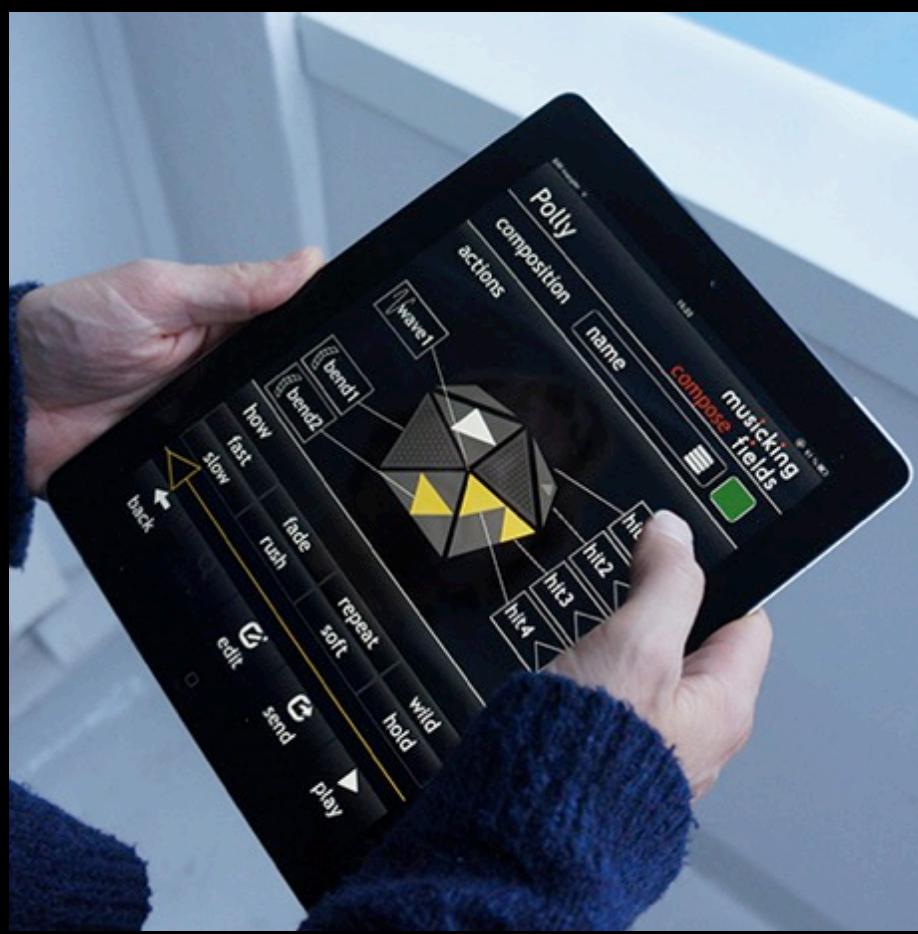

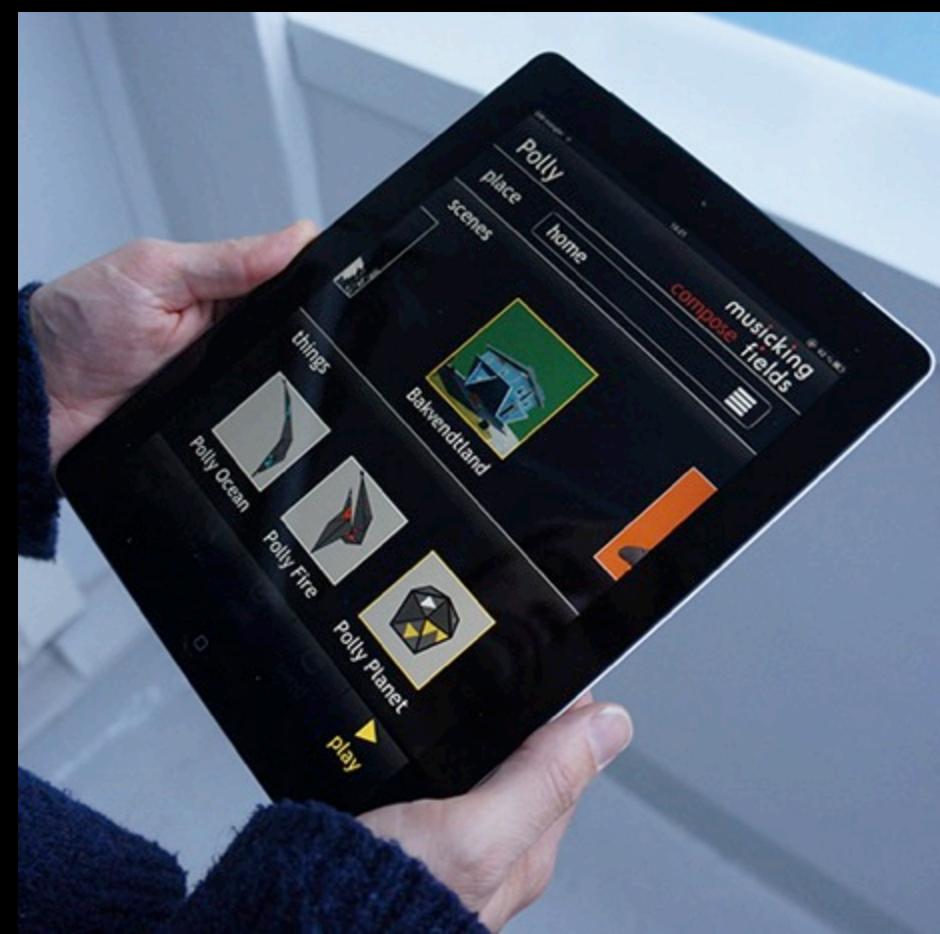

Interactive Things

(mobile things to play on)

RHYME.no

Our conclusion so far...

Musicking, co-creative tangibles, MusickingFields

Should have 4 qualities to be empowering and health improving:

1. Evoke interest and **positive emotions** relevant to diverse people's **interpretation** of the tangibles and the **situation**.
2. Dynamically offer **many roles** to take, **many musicking actions** to make and **many ways** of self-expression.
3. Offer aesthetically **consistent** response and build relevant cross-media **expectations** and challenges over time and space, consistent with their **character**.
4. Offer **many relations** to make: to people, things, experiences, events and places.
